VOLUMES 30-44

BY
LESTER L. MILLER, JR.

THE MORRIS SWETT LIBRARY
U. S. ARMY FIELD ARTILLERY SCHOOL
FORT SILL, OKLAHOMA 73503

This index is dedicated to the memory of those who have made the supreme sacrifice in all wars --but most specifically to those who have done so in the cause of America's freedom, and even more especially to those military and civilian members who did so in conjunction with actions at Bataan-Corregidor in 1942.

FOREWORD

The publication of this index represents the culmination of a project which has languished since at least 1945 and which has been sorely needed since the publication of MSG Morris Swett's initial index in 1940. Mr. Miller has made a major contribution to military science literature. It is reasonable to expect that this index will still be in use fifty or a hundred years from now when almost all of the publications now being produced by the Army will have gone the way of the Passenger Pigeon and the battleship because of new technology, etc. This is the type of material which uniquely represents what the Field Artillery School is striving to accomplish, a lasting contribution which is also of immediate use.

JAMES H. BYRN
Supervisory Librarian
Morris Swett Library
US Army Field Artillery School

PREFACE

This author-subject index covers the period January 1940 through December 1976. In terms of volume this constitutes coverage of material indicated in volumes thirty through forty-four. Although there was continuity in volume numbering, the Field Artillery Journal was discontinued from August, 1950 to the summer of 1973. During this interim period the Field Artillery Trends, renamed the Field Artilleryman, was issued on an in-house basis. Indexing of these "trends" is done on a separate basis. During 1946-1950, 1976, the Field Artillery Journal included an author-title index at the conclusion of each volume as a reader service. As with the prior two indexes (1911-1939 and 1940-1945) this third part does not include a titles section. Assigned subject headings stress usability. Throughout, the thrust has been on specificity of entry which relates in one way or another to some aspect of the main subject: ARTILLERY. In most cases this has involved the use of more than one subject heading to adequately introduce an article.

Where dates are shown, these are used to specify a time-frame or to identify a given individual. Military rank is shown under the author entry. Dates of birth and death are given where known.

Subject headings for this index were adapted from the headings used by the Library of Congress, Military Review, Sears, Morris Swett's Index (1911-1939), or are my own. As a result, virtually every article, editorial, feature, and many related letters are indexed.

The period between the two parts of the journal (1950-1973) saw the involvement of the U.S. Army in two major wars and numerous special actions, the evolution of the U.S. Air Force as a separate service, transitions in research and development, new approaches to doctrine, an increased emphasis on human factors, and many artillery branch and U.S. Army Field Artillery School developments. Any of these changes could have made the new journal read differently from the old. In an attempt at integrating the two, by way of an index, acronyms and abbreviations have been introduced to complement the former. These are used side-by-side in one alphabet. Cross references have been devised, where possible, which go from variations in name form to those selected for use.

Lester L. Miller, Jr.
Reference Librarian
